

Nova Cyclone – Automatic Rotating & Vibrating Masturbator by JOYSTOYS PARIS

SKU : FJB42 · Brand : JOYSTOYS PARIS

The Nova Cyclone by JOYSTOYS PARIS is a next-generation automatic masturbator engineered to deliver an immersive, realistic stroking experience. Its transparent TPE sleeve, sculpted with internal spiral ridges and stimulating nodes, wraps around the penis to create progressive suction and friction with every movement. Unlike traditional manual masturbators, this model features a built-in automatic rotation motor paired with dual vibration, mimicking an expert hand-job motion of thrusting and twisting with zero effort required. The ergonomic pearl-white ABS housing, accented with a decorative diamond-style ring, is controlled through an intuitive LED touch panel featuring a power button, a vibration mode selector, and a circular light-up slider for real-time rotation intensity adjustment. USB rechargeable, the device offers reliable battery life for multiple sessions without ever needing batteries. Its splash-resistant design makes post-use cleaning quick and simple, ensuring the impeccable hygiene standards that specialty retailers and their discerning customers expect. Compact and discreet when powered off, the Nova Cyclone stands out as a flagship mid-to-premium item, perfect for expanding a catalog of innovative male sex toys that bridge assisted solo pleasure with easy-to-use connected technology. The clear sleeve also lets users watch the internal motion in action, a strong selling point for both in-store displays and online listings.

Highlights

- Smart automatic rotation combined with dual vibration
- Textured transparent TPE sleeve for a realistic suction effect
- LED touch control panel with progressive intensity adjustment
- USB rechargeable with long-lasting battery life
- Splash-resistant design for easy post-use cleaning
- Ergonomic pearl-white ABS body for a comfortable grip

Technical specifications

Main function	Automatic rotation and dual-motor vibration
Inner sleeve material	Phthalate-free transparent TPE
Body material	Rigid ABS
Total length	approximately 17 cm / 6.7 in
Canal diameter	approximately 3.5 to 4.5 cm / 1.4 to 1.8 in
Power source	Built-in USB rechargeable battery
Water resistance	Splash-proof, washable under running water
Controls	LED touch panel with power button and mode selector

Vibration/rotation modes	Multiple adjustable intensity levels
Color	Pearl white and transparent

Box contents

- 1 Nova Cyclone automatic masturbator
- 1 USB charging cable
- 1 multilingual user manual

Usage tips

Apply a generous amount of water-based lubricant inside the canal before each use for optimal comfort and smoother automatic motion. Turn on the device using the power button, then select the desired rotation and vibration mode via the touch panel. Gradually increase intensity based on personal preference.

Care instructions

Clean the internal TPE canal with warm water and a dedicated sex toy cleaner after each use. Dry thoroughly before storing in a dry place, away from direct light and heat. Do not fully submerge the control unit in water despite its splash resistance. Use only water-based lubricant, which is compatible with TPE material.

Safety information

Adults only product. Do not use if you have a known allergy to TPE or ABS. Do not submerge the control unit in water. Do not expose to extreme temperatures. Keep out of reach of children. Use only water-based lubricant to preserve the material.
