

JOYSTOYS PARIS Realistic Thrusting Vibrator with Heating Function and Remote Control

SKU : VIBROMASSEUR-VA-ET-VIENT-YIX1 · Brand : JOYSTOYS PARIS

The JOYSTOYS PARIS thrusting vibrator faithfully replicates the anatomical shape of a penis with striking realism: visible veining, a textured head, and detailed testicles deliver an immersive sensory experience worthy of premium-tier products. Crafted from liquid silicone over an internal ABS structure, it combines a soft, supple feel with the mechanical strength needed to withstand repeated thrusting motion without losing performance. The device offers 5 modes blending vibration and thrusting (automated penetration movements), plus an independent heating function that brings the toy's surface closer to body temperature for heightened realism. Its powerful suction-cup base ensures rock-solid stability on any smooth, flat surface, enabling hands-free use on walls or floors, whether solo or with a partner.

The included wireless remote allows discreet, remote control of every mode — ideal for solo play, couples' play, or long-distance intimacy. USB rechargeable with no batteries required, it's built for economical, long-term use. Designed and engineered in Paris, this product is available in two colors, black and flesh-tone, to suit every customer preference.

A versatile, technically advanced, high-turnover item, perfectly suited for adult retail shelves, specialty boutiques, and B2B e-commerce platforms seeking a premium product that combines realism, innovative technology, and easy resale.

Usage tips

Turn the device on before using the remote control. A short press cycles through vibration or thrusting frequencies, a long press toggles the vibration mode on or off, and another long press pauses or reactivates the device. A dedicated short press turns the heating function on or off. Use a water-based, silicone-safe lubricant for optimal comfort. The suction-cup base allows mounting on any smooth, flat surface (wall, floor, furniture) for hands-free use, whether solo or with a partner.

Care instructions

Clean before and after each use with a dedicated toy cleaner or warm water and mild, alcohol-free soap. Dry thoroughly before storing in a clean, dry place away from direct light, ideally in an individual storage pouch. Avoid silicone-based lubricants, as they may degrade the material. Never immerse the remote control or USB charging connector in water.

Safety information

This product is strictly intended for adult use (18 years and older). Always check lubricant compatibility with silicone material before use. Keep out of reach of children. Do not immerse the device beyond manufacturer specifications, and never submerge the remote control or USB charging connector. Clean thoroughly before each new user or partner.

Certified CE and UKCA.
